

# Requirement for Management System

To safeguard existing quality requirements our suppliers are generally obligated to ensure a certified management system complying at the very least with ISO 9001. If supplier is manufacturer it shall introduce and develop an environmental management system (EMS) analogous to ISO 14001 or an environmental management system which is appropriate to the specific industry.

## Providing certificates with less effort

Supplier maintain their data once and thereby making it available for their customers on SupplyOn.

## How to use the simplified process?

Register now at SupplyON to maintain your certificates and contact data by sending a request for registration for module Business Directory to your Purchasing Mentor. The module is free of charge for our suppliers. Data are directly reported into our Supplier Relation Management Tool.

Subject to different contractual agreements, Bosch is asking regularly for the evidence of the following certificates:

- ISO 9001 (Quality Management Systems – requirements)
- IATF 16949 (Quality Management System requirements for automotive production and relevant service parts organisations)
- ISO/ IEC 17025 (general requirements for the competence of testing and calibration laboratories)
- ISO14001 (Environmental Management Systems – requirements with guidance for use)
- OHSAS18001 (Occupational Safety)
- AEO (Authorized Economic Operator)
